## About

---

Front-end developer with over 4 years of experience, specializing in the React ecosystem. Software house professional with extensive experience across various products in different domains.

## Experiência

---

### Nav9

#### Front End Developer | 10/2019 - 12/2023

As a Front-end Developer at Nav9 software house, I have led and participated in projects across various sectors including education, banking systems, digital marketing, entertainment, and more. Over the course of 4 years, I have gained experience in diverse tech stacks, including React, React Native, Vue, and Angular. Here are some examples of my contributions to projects:

- Education Sector:

In the education sector, I had the privilege of developing platforms utilized by major Brazilian school networks. My work facilitated seamless communication, optimized processes, and enhanced the learning experience for numerous students, educators, and administrators.

- Banking Internal Systems:

In the banking realm, I applied my front-end development expertise to enhance internal systems, with a strong focus on automation and digitization of complex forms. This approach ensures efficiency, security, and a user-friendly interface for financial professionals.

- Digital Marketing Projects:

In the dynamic field of digital marketing, I actively participated in the creation of platforms that simplify the creation of sales funnels and landing pages.

- Sports Leagues:

The trivia games I developed for prominent global sports leagues brought fans together, fostered community engagement, and improved interaction with beloved sports brands.
